stake.futurebit.in

FutureBit Staking (FBit) is an independent Solana DeFi protocol — not affiliated with FutureBit LLC's Bitcoin mining hardware.

OVERVIEW

What Is FutureBit Staking?

FutureBit Staking is a non-custodial DeFi staking protocol for the FBiT token, built on Solana. Stake FBiT to earn dynamic Proof-of-Stake rewards that adjust automatically with total tokens staked, refer new stakers for on-chain commissions up to 10 levels deep, and grow your team's stake to unlock extra bonus tiers — all without ever giving up custody of your tokens.

Token Name	FutureBit	Symbol	FBiT
Network	Solana Mainnet	Standard	SPL Token
Total Supply	250,000,000 FBiT	Decimals	9
Mint Authority	Renounced	Liquidity	100% Locked / burned

HOW IT WORKS

Everything Runs On-Chain

Built on Solana

Fast finality and low fees — stake, claim, and compound without heavy gas costs.

Dynamic PoS APY

APY adjusts automatically with total staked — fully on-chain and transparent.

10-Level Referrals

Earn commission up to 10 levels deep — up to 30% total, paid automatically.

Team Target Bonus

Grow your team's total stake to unlock extra bonus tiers on top of base APY.

Deflationary Burn

A portion of every claim is burned on-chain, permanently reducing supply.

Non-Custodial

Your tokens never leave your wallet. No KYC, no sign-up required.

GETTING STARTED

Stake in Four Steps

No sign-up, no KYC — just a Solana wallet. Every step below happens directly between your wallet and the smart contract.

1

Connect your wallet

Visit stake.futurebit.in, click "Launch App," then "Connect." If someone referred you, enter their wallet address here — it's saved on-chain permanently and only needs to be set once.

2

Enter an amount and stake

Open the Stake tab, enter how much FBIT to stake (minimum 0.1 FBIT), review the current dynamic APY and the 30-day lock period, and confirm.

3

Claim or compound every 6 hours

Rewards accrue continuously and become claimable every 6 hours. Claim to your wallet, or compound them back into your stake to grow it faster.

4

Unstake anytime after 30 days

Once the lock period ends, withdraw your full principal plus any unclaimed rewards in a single transaction.

REFERRALS & TEAM BONUS

Two Extra Reward Layers

Both calculated and paid automatically on-chain — no manual claiming, and your referral never loses any of their own reward.

10-Level Referral Program

30.00% total

Level 1	0.25%	Level 6	3.25%
Level 2	0.50%	Level 7	3.50%
Level 3	1.25%	Level 8	4.25%
Level 4	1.50%	Level 9	5.50%
Level 5	2.00%	Level 10	8.00%

Team Target Bonus

up to +10% APY

Bronze +2% 50K	Silver +3% 100K	Gold +4% 250K	Platinum +5% 500K	Diamond +6% 1M
Ruby +7% 2.5M	Emerald +7.5% 5M	Sapphire +8.5% 10M	Obsidian +9% 20M	Titan +10% 100M

SECURITY & TRUST

Built to Be Trusted

Every claim below is independently verifiable on-chain — nothing here relies on taking our word for it.

100% Liquidity Locked/Burned

All FBiT/SOL pool liquidity is permanently locked or burned.

Fixed Supply, No Minting

Mint authority renounced — the 250M supply is permanent.

Team & Marketing Vesting

0.5% allocation locked under a 10-year vesting schedule, 6-month cliff.

Open-Source & Verifiable

Smart contracts are open-source and verifiable on Solana Explorer.

Non-Custodial

Your tokens never leave your wallet — we never hold your funds.

Bot & Abuse Protection

Rate limiting and risk checks, with zero KYC data collected.

ROADMAP

Where We're Headed

Goals we're building toward — not guarantees of a specific exchange or date.

- **Phase 1 — Foundation** **COMPLETE**
Solana staking live, 10-level referrals, Team Target Bonus, auto-emission reserve, deflationary burn.
- **Phase 2 — Consolidation & Security** **CURRENT**
Fixed-supply FBiT v2, 100% liquidity locked/burned, 10-year team/marketing vesting, independent audit.
- **Phase 3 — Market Expansion** **PLANNED**
Additional DEX liquidity depth, community growth, DeFi ecosystem partnerships.
- **Phase 4 — Exchange Listings & Governance** **PLANNED**
Tier-2/3 CEX outreach, Tier-1 listing readiness, DAO governance.
- **Phase 5 — Long-Term Vision** **PLANNED**
Additional chain deployments, expanded token utility, ongoing audits.
